

Bantu Cloud Readiness Services

Bantu is a trusted partner in providing technical support in mission critical and secure environments

Bantu is the expert in the cloud readiness and migration in mission critical environments

Business Challenge

Federal agencies are seeking to cut costs, speed delivery of new applications and improve operational reliability by leveraging cloud services. In order to prepare for the transition to the cloud and reduce risk, agencies need to begin taking cloud readiness steps now, such as assessing current applications, detailed planning and platform engineering in order to reduce the risk of a migration to a shared services environment.

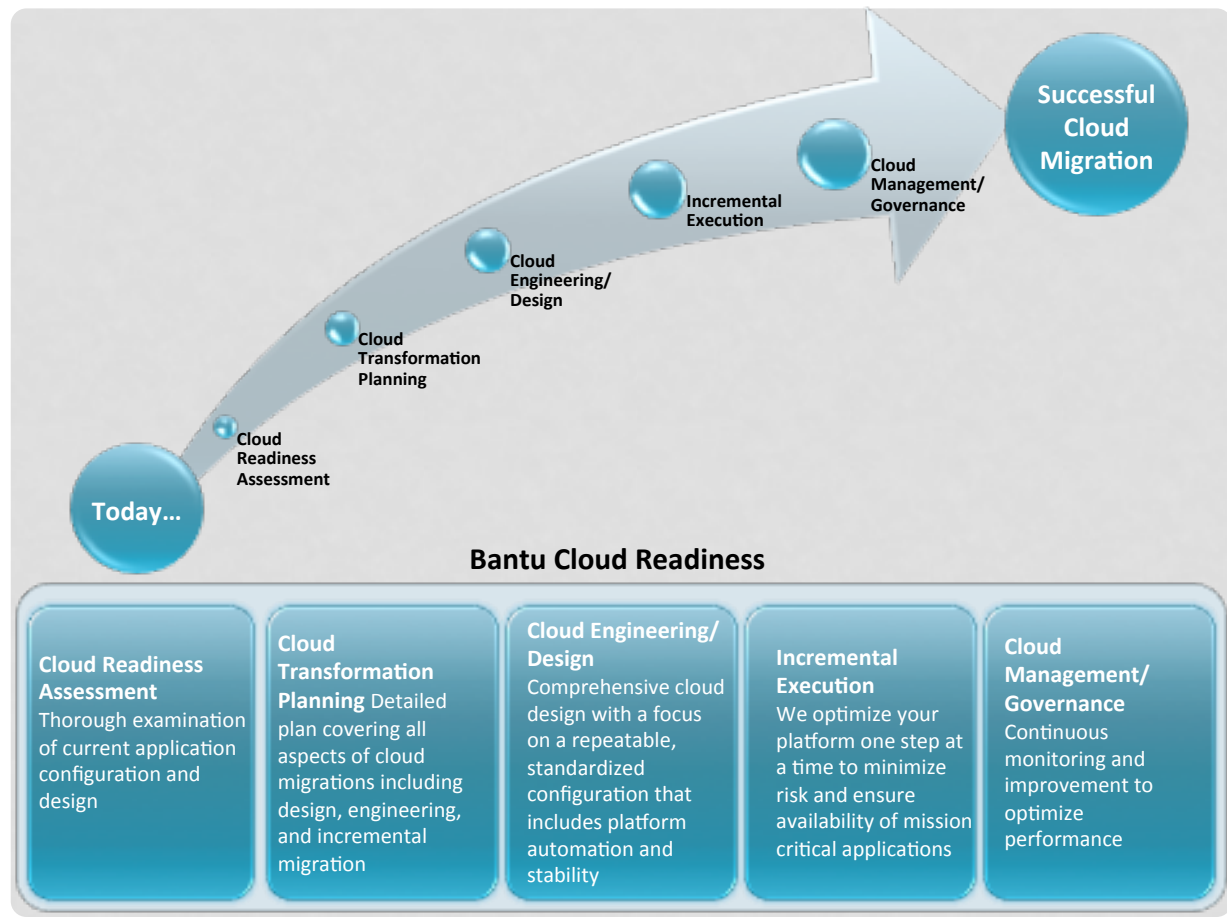

Bantu Solution

For over 12 years Bantu has provided secure information sharing software and services to the government and commercial markets. We have extensive experience helping our customers prepare for migration to the cloud with proven tools and technical expertise. We will work with your team to provide:

- Cloud Readiness Assessment
- Cloud Transformation Planning
- Cloud Engineering & Design
- Incremental Execution
- Cloud Management & Governance

Bantu Advantage

- Bantu has extensive experience providing cloud readiness and management solutions in secure, complex government environments.
- Bantu has been on the forefront of implementing and maintaining secure applications in hosted environments since 2001.
- We maintain over 60 mission critical applications in cloud environments for our clients including the U.S. Army, U.S. Air Force, FAA and EPA.

Key Benefits:

- Detailed understanding of application design, engineering, operational and migration issues
- Preparation and testing that will be necessary for early/key migration successes shortly after cloud migrations begin.
- An incremental approach to migrating applications to reduce risk.
- Development of key “lessons-learned,” best practices, metrics and other information that will assist ongoing cloud readiness and smoother migration to the cloud; and
- Immediate cost/resource savings.
- Maximize ROI from cloud infrastructure investments.
- Bantu is a trusted partner in providing technical support in mission critical and secure environments.

About Bantu:

Bantu, Inc. is a leading provider of secure communications software and consulting services to military, government and commercial customers. In addition to providing secure messaging software used by over 1 million military users, Bantu provides high-end communications network, database, security and development services to various government customers at cost-effective rates.

Select Government Clients:

Bantu has proven its ability to successfully solve some of the government’s most complex technical, security, scalability and network challenges having worked for many years with government agencies like U.S. Army Knowledge Online Program (AKO); U.S. Air Force GCSS Air Force Portal Program, U.S. Navy, Intelligence Agencies, State Department, and the U.S. Postal Service.
